

GUTTER KIT STAND. CARPORT 2.5 Mt LEG

Allowing approximately an 1" fall towards outlet, fix gutter brackets, outlet and gutter joiner with self tap screws. On non outlet end put bracket approximately 115mm (6") from end and the remainder, position equally. Clip gutter into brackets, checking that at outlet end it is pushed only as far as the marked line to the right and position small gutter extension to the left. Push stop ends into place.

Position down pipe, and trim to required length then fix with round brackets Using self tap screws. Push on shoe.
